2023 ANNUAL REPORT

Impact of Hope: Jackie's Volunteers in Medicine Story

Just knowing you have somewhere to go when you need support can make all the difference in the world.

Jackie became a patient at Volunteers in Medicine four years ago, and the clinic has provided much-needed medical care throughout her health journey with multiple strokes and recent skin cancer. However, she said the emotional and spiritual support may have been the most profound.

"I just feel better equipped now because I'm on the right medications. They've made a huge impact as far as me having hope," Jackie said. **"Just knowing that someone is there makes things easier."**

The Importance of Connection: Roberto's Kids Club Story

By prioritizing relationships, Kids Club is making an impact on behavior, academics and beyond.

At the beginning of the school year, Roberto was behind in reading and math, and was having a difficult time regulating his emotions.

"Relationship building is the most important part of what we do," shares Kids Club Program Coordinator Lauren Tysdal. "You can't share the love of Christ with someone who doesn't feel that connection with you."

As the Kids Club team invested in him over time, Roberto began to grow. Now he is eager to lend a helping hand and fosters connections with others each day.

New Clinic Building Under Construction

Oakwood Church is building a new home for Volunteers in Medicine. The 9,000 sq ft building is located across the street from the current VIM location. The new building will provide 6 exam rooms, 3 dental operatories, patient education classroom and space for the NBCM administrative offices. **We look forward to serving patients in the new clinic building in late 2024.**
