FINDING HOPE + HEALING

Having somewhere to turn when encountering health issues can make all the difference in the world. Before finding Volunteers in Medicine (VIM), Amy was in and out of the hospital without any real answers, and her health was rapidly deteriorating.

Amy said, **“When I found them, it literally changed my life.”** VIM helped her connect to specialists to get the needed testing, procedures and treatment plans in place. Amy began to get the answers, and more importantly the hope, that she needed.

For the first time in a long time, she felt heard and supported, and Amy's health started to improve. She shared, **“I have hope. I have strength. I am doing better than I think I've done in the last six or seven years. I'm getting healthier, and I can feel it and I can see it.”**

LEARNING THROUGH LOVE

to hear more of Oscar's story

Relationships are the foundation of learning and growth. When a child knows you love them, they learn to trust you and are more open to receiving your help. It is through that loving relationship that a child can begin to thrive—emotionally, academically and spiritually.

Oscar is a great example of this transformation. When he first came to Kids Club (KC), he was shy, withdrawn, and unsure of himself. **Over time, Oscar heard the message of God's love and began to feel the support and love of staff, volunteers and peers.**

Today, Oscar loves coming to KC, and it's clear he's more confident, eager and engaged than ever before. Not only has he learned about the love of Jesus Christ, but he has also discovered that learning can be fun, and that there are people who genuinely care for him. Watching Oscar's journey unfold has been such a joy, and we can't wait to see what God will do in his life in the years ahead.

Sharing the love of Christ by investing in people
